

EVENT:

Hands-on Internet Safety for Parents

Today, our kids use the Internet and other forms of technology to communicate in ways that we, as parents, do not fully understand. It's called *social networking*. In order to stay current with our kids, parents need hands-on activities to learn what **they** can do to maximize our family safety. There are many ways to help keep kids safe while they are on-line. Some are even free! Join us to learn about them...

OUTCOMES:

Participants will learn:

- How to take control of your own PC
- Free ways to protect your children while they are on-line
- Learn how to install and configure software to limit and monitor your kid's online activities
- Using the hardware you may already have to control your kid's online activities
- Information about commercial products and services that can protect your kids while they are online

AUDIENCE:

Parents, Relatives and Other Caring Adults, Teachers, Community Agency Professionals

PRESENTER:

Officer Bob Querback, Bay City PD & FBI Computer Crimes Task Force
Certified Computer Forensic Investigator, Certified Computer Repair Technician
